ALIEN

There are always some chairs much special as if they came from the outer space. With precise and elaborate details like those of a spacecraft seat, they play an incomparable role in office space and lead the trend in functional chair innovation.

Inspired by the movie Alien, the chair is constructed with lines with a science-fiction-like vibe and endowed with a surrealism characteristic. Let's sit down and enter another dimension of office space.

With smooth lines, a futuristic sense and extreme visual tension, the back frame of Alien brings a certain mysterious accent to your office. The sandblasted PA fiberglass and the flowing lines make this chair look like a swaying alien under sunlight.

A high-quality office chair should offer its user firm support while still being flexible and air-permeable. Alien adopts Korean Wintex elastic mesh, of which 0.5mm air vents ensure quick emission of heat and moisture, keeping your body fresh and clean. Fabrics of different densities are designed for providing an overall support to your thigh, bottom, hipbone, waist and back. Say bye-bye to tiredness resulted from long-time sitting.

Armrest height adjustment

Lounge-like backrest

Back frame

Nylon castor

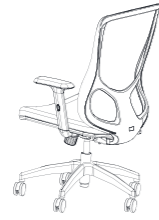

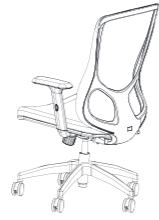

Science will unveil its magic once you step into a science and technology museum. The unique Alien chair will take you to a trip to the future office once you sit on it.
